Sea-Doo Spark

Light Enough to Tow with Your Sedan

Most cars can tow at least 1,500 pounds, so they can handle a single Sea-Doo Spark with trailer. Some cars can tow double jetski trailer and Sparks depending your car's capabilities.

Here are 4 factors to consider.

- Spark dry weight = 439 Lbs. (3UP)
- What is the weight with fuel and accessories?
- Your trailer's weight and carrying capacity
- Your car's towing capacity
- The tow hitch's style and capacity
- The angle of launch ramp
- The general terrain in your area
